

WHAT IS CRYPTO CURRENCY?

A SIMPLE EXPLANATION FOR
BEGINNERS

Cryptocurrency is digital money that exists only online. It is not controlled by banks or governments. Instead, it runs on a secure network called blockchain.

KEY POINTS:

- ✓ *No central authority (like banks)*
- ✓ *Uses blockchain to keep records safe*
- ✓ *Fast and low-cost transactions worldwide*
- ✓ *Bitcoin & Ethereum are the most popular*

USES:

- *People buy and sell it like an investment*
- *Some businesses accept it as payment*
- *Used in online finance without banks*

RISKS:

- ⚠ *Prices go up and down a lot*
- ⚠ *Some countries ban or restrict it*
- ⚠ *If you lose your wallet key, your money is gone forever*
